

LAWRENCE SHERIFF SCHOOL RUGBY

FIRST AID POLICY

The School's First Aid Policy is based on a document issued by Warwickshire County Council and entitled the "Warwickshire Schools Health Directory".

To enable us to adhere to guidelines outlined in this document the following systems are in place within the school:

- (a) All parents are asked to complete a medical form notifying the school of health problems, their treatment and emergency contact numbers.
- (b) Parents and students receive an annual letter detailing the procedures for dealing with first aid emergencies within school, and also outlining contacts for general medical concerns, etc.
- (c) All new parents attending the Induction Evening are asked about and given an opportunity to discuss their son's specific health problems.
- (d) Staff have received training in emergency resuscitation techniques and in handling medical emergencies and they receive regular updates on other medical matters.
- (e) Students' emergency medication supplies, as provided by their parents, are available in the Matron's room.
